LIBRARY NEWSLETTER

Vol. 1, No. 1

March 5, 1942

"When people are burning books in other parts of the world, we ought to be distributing them with greater vigor; for books are among our best allies in the fight to make democracy work."

-- John W. Studebaker

A USDA LIBRARY FOR THE NORTHERN GREAT PLAINS REGION

Through the cooperation of the Soil Conservation Service, the Farm Security Administration, the Bureau of Agricultural Economics, Forest Service, the Agricultural Adjustment Administration, the Office of Information, Office of Land Use Coordination, and the Office of the Solicitor, a Branch Library of the U. S. Department of Agriculture has now been established in Lincoln. Its purpose is to serve the official reference needs of the personnel of the Department of Agriculture in the Northern Great Plains Region.

Soil Conservation Service Region 7's Library has served as the nucleus around which the Branch Library has been organized, to which has been added the smaller library collections of Forest Service, Bureau of Agricultural Economics, and Farm Security Administration. We can always borrow from the Department Library in Washington the books you request, arrange for inter-library loan service from local libraries, as well as loan to you books, pamphlets, bulletins, reports, etc., from our own collection.

The Library is located at present in room 344 of the Atlas Building, Lincoln, and is open for reading and reference, Monday through Friday, 8:00 a.m. to 5:30 p.m. and on Saturday, 8:00 a.m. to 1:00 p.m.

Requests for loans or answers to reference questions can be made in person, by letter, or by telephone (2-7241, Extension 233).

#### CIRCULATION PRIVILEGES AND RESTRICTIONS

1. The current issue of each periodical will be in the library reading room for one week after it is received.

507000

2. All indexes, abstract services, government manuals, the Congressional Record, the Federal Register, etc., will be reserved for reference in the library only.

3. Certain other periodicals, if designated by technical divisions as necessary for continuous reference will be reserved for use in the library or for circulation only in Lincoln.

4. Other periodicals can be circulated ON REQUEST to regional and field offices. They will be routed in the order that requests are received by the library, except that priority will be given to regional divisions having a primary interest in the subject matter.

5. A time limit of two days will be set on circulation to each regional office division and of three days to each field office, except where the request list is very short, or when the subject matter is of primary interest to only one or two divisions or offices.

6. Since circulation to field offices will not begin until circulation to regional offices is completed, it is of the utmost importance that routing be kept definitely to schedule. Even so, it will often be several weeks after date of issue before a requested periodical can be expected to reach field offices.

7. If the request list for any periodical becomes too long, the list will be closed and subsequent requests held on a waiting list to replace cancellations on the active list.

8. It is hoped that staff members of the agencies located in the Atlas Building will use current periodicals in the library reading room whenever possible, so that some preference in circulation may be given to the agencies located at a distance from the library.

The librarian will notify you regularly during the week a periodical in which you are interested is in the reading room. You will then have opportunity to see it more promptly than if you wait for it to be routed to you. At the same time you will speed its circulation to others.

In asking to see periodicals regularly, therefore, please indicate whether you prefer notification or circulation.

#### Reference Books

As a result of the consolidation of all bureau libraries in Washington with the Department Library, we have been fortunate in securing for the Lincoln Branch Library the following reference sets, indexes, and bound volumes of periodicals, which will be invaluable to us in filling your requests and answering reference questions:

Agricultural economics literature, 1936 to date.

Agricultural Index, 1916 to date.

Biological abstracts, Vol. I, 1926 to date.

Encyclopaedia Britannica, 14th ed. 24 volumes.

Experiment station record, Vol. 48, 1923 to date.

Journal of agricultural research, Vol. 29, 1924 to date.

#### Photostat Press Service

Through the courtesy of Mr. Frank E. Charles, Regional Representative of the Office of Information, U. S. Department of Agriculture, the daily sheets of the Photostat Press Service are in the library each day. These sheets give a nation-wide coverage of agricultural news photostated from daily newspapers throughout the country.

Anyone interested in keeping in regular touch with current affairs in agriculture might well make it a habit to consult these sheets daily in the library.

LIBRARY NEWS LETTER

Vol. 1, No. 3

April 30, 1942

"We must define democracy as that form of government and of society which is inspired above every other, with the feeling and consciousness of the dignity of man." --Thomas Mann.

LIBRARY HOURS

Daily: 8:00 a.m.-5:30 p.m.  
Saturday: 8:00 a.m.-1:00 p.m.

Requests for loans or answers to reference questions can be made in person, by letter, or by telephone (2-7241, Ext. 230).

On Saturday, April 4, the Library was moved to its permanent location in rooms 339-341 of the Atlas Building. It now occupies approximately 1190 square feet of floor space, including reading room, book stacks, office, and work room. When any of you Department people have occasion to come to Lincoln, we shall be happy to have you visit the Library. In the meantime, your requests for literature which may be needed in connection with your work will be welcomed.

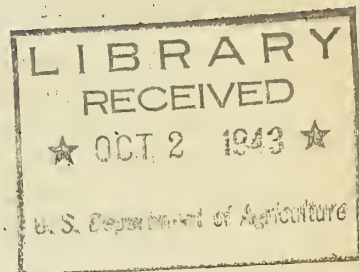

If the material requested is not filed in our own library collection, a check will be made to find whether it is located in any of the other libraries in Lincoln. If available, we will borrow it for you as an inter-library loan. If the publication is not available in any Lincoln Library, the request will be transmitted to the Department Library in Washington, and in most cases, should be received within a few days.

OLD McDONALD HAD A FARM

By Angus McDonald

New York, Houghton Mifflin Company, 1942

Comments by B. W. Allred, Chief, Range  
Conservation Division, Soil Conservation Service

"Old McDonald Had A Farm" is the salty biography of an Oklahoma preacher, farmer and conservationist, written by his son, Angus McDonald. The Old Man, as the author calls his father, converted a sterile, rocky hill-top farm into a show place that yielded returns which eventually made him independent and well off.

According to the views of Old McDonald, the road to Hell was just as slick for those who sinned against the soil as those who sinned against the soul.

The book is solid entertainment for the writer has filled it to the guards with pungent barnyard humor. The idiom is as natural as the roily rainwater that dashed down the cotton rows of his neighbors' farms.

LIBRARY NEWS LETTER

Vol. 1, No. 6

September 1, 1942

"To know how to find in books and journals  
just the information you need--that is to  
hold the eel of wisdom by the tail."

-- John Cotton Dana

Requests for loans or answers to reference questions can be made in person, by letter or informal memorandum, or by telephone (2-7181, Ext. 81)

On August 12 the USDA Lincoln Branch Library was transferred to the University of Nebraska Library. Our office is now located in Room 105, first floor of the main University Library building on the City Campus, corner of 11th and R Streets. Department people are requested to come here for all library services.

The USDA Library is now officially affiliated with the University of Nebraska Library by action taken at the meeting of the Library Advisory Committee attended by the Department Librarian from Washington on June 29, and subsequent contract with the University of Nebraska. It is believed that the new arrangement will afford greatly expanded opportunities for study and research by the regional staff of the Department as well as for general reference use by the various bureaus with regional offices in Lincoln. Under the new set-up, Department of Agriculture personnel in Lincoln and in the Northern Great Plains Region will acquire all the loan and stack privileges which the University Library grants to members of the faculty.

Under the new merger, the University Library will assume responsibility for the technical processes, including classification and cataloguing, formerly done by the Lincoln Branch Library, which will permit more time for the regional librarian to do reference work for USDA personnel in Lincoln and in the field and for conferences with regional chiefs of divisions to learn the literature needed by each division in carrying on its work.

All special services formerly afforded by the Lincoln Branch Library will be continued with the advantage of having the entire University Library collection including that of the Agricultural College to utilize in providing these services.

These services include looking up answers to reference questions, searching for and assembling literature on various subjects as needed, compiling book lists, requesting books from the Department Library in Washington if they are not available in Lincoln, ordering new books recommended by Department people, and routing current periodicals to regional offices in Lincoln and field offices throughout the six states in this region.

Messenger service consisting of two trips daily to the University Library has been provided by SCS for USDA offices located in the Rudge and Guenzel and Post Office Buildings, so library requests can usually be filled the same day they are received.
